DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed 21 July 2005 amends claims 1-7, 12, 13, cancels claim 14, and adds claims 15-23. Applicant's amendment has been fully considered and is entered.

Response to Arguments

2. Applicant's arguments, filed 21 July 2005, with respect to claims 1-13 have been fully considered and are persuasive. The rejections of claims 1-13 have been withdrawn.

Allowable Subject Matter

3. Claims 5-22 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art does not disclose comparing master correlation patterns to the slave correlation patterns, which are recorded while the laser signal beam cycles between first and second operating modes, to determine the time offset between the master and slave correlation patterns, and applying the time offset to the slave clock.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Claims 1-4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2132

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. Claim 1 recites the limitation "the first slave correlation patterns" in lines 13-14. There is insufficient antecedent basis for this limitation in the claim. It is believed that the limitation should be "the master and slave correlation patterns".
